

## How do landowner's know if they are doing everything they need to make and keep their soil healthy?

A growing number of America's farmers are using soil health management systems to improve the health and function of their soil. The USDA/NRCS is working hand-in-hand with producers by providing technical and financial assistance. When farmers use soil health management systems, they are building the soil AND building the land's potential for production.

### FREE WORKSHOP - Please RSVP JULY 18, 2015

Alabama Cooperative Extension System  
1501 North Airport Road, Jasper, AL 35504
